

Problem

A subsequence is a sequence that can be derived from another string by deleting some or no characters without changing the order of the remaining characters.

Print:
YES if "hackerrank" is a subsequence of s. NO otherwise.

Input Format

The first line contains an integer q, the number of test cases.
Each of the next q lines contains a string s.

Constraints

1 ≤ q ≤ 100 1 ≤ |s| ≤ 10^5
The sum of the lengths of all strings does not exceed 10^6.

Output Format

For each test case, print:
YES
or
NO

Sample Input 0

hackerworld

Sample Output 0

NO

Hidden Test Case

Use print or log statements to debug why your hidden test cases are failing. Hidden test cases are used to evaluate if your code can handle different scenarios.
